18.View system version

1. View system version information
2. jetson nano Check jetpack version

The following content takes the jetson nano system version as an example to display the system version information.

1. View system version information

Check system kernel version

```
uname -rv
```

```
jetson@yahboom:~$ uname -rv
4.9.299-tegra #1 SMP PREEMPT Tue Nov 22 09:24:39 PST 2022
jetson@yahboom:~$
```

View machine hardware platform

```
uname -m
```

```
jetson@yahboom:~$ uname -m
aarch64
```

View all system version information

```
uname -a
```

```
jetson@yahboom:~$ uname -a
Linux yahboom 4.9.299-tegra #1 SMP PREEMPT Tue Nov 22 09:24:39 PST 2022 aarch64
aarch64 aarch64 GNU/Linux
```

2. jetson nano Check jetpack version

Enter the following command in the jetson nano system terminal to check that the system version is R32.7.3

```
cat /etc/nv_tegra_release
```

```
jetson@yahboom:~$ cat /etc/nv_tegra_release
# R32 (release), REVISION: 7.3, GCID: 31982016, BOARD: t210ref, EABI: aarch64, D
ATE: Tue Nov 22 17:30:08 UTC 2022
jetson@yahboom:~$
```

Open the Jetson Linux Archive website in your browser to check the corresponding version.

```
https://developer.nvidia.com/embedded/jetson-linux-archive
```

Find the corresponding version, click to enter the 32.7.3 version information, and you can see that R32.7.3 corresponds to the Jetpack 4.6.3 version.
